

Dear Horticulturists,

Thank you for your help with my problem. While growing up, my father was able to grow amazing pumpkins so when I was little I hid a few seeds in an old shoe. I planted my pumpkins in spring of this year, about 3 inches deep. I made sure to plant them in dry soil, because that is what my friend Fred told me to do. I did water them every day, but when I went on vacation by neighbor forgot to for a few days. On my farm, I have not installed fencing yet in case you're wondering. I hope you can help me with problem!

Respectfully,

Farmer Brown
